Coming to age, Rama is said to have ruled Ayodhya for 10,000 years. But in the Yuga's that followed, the average life span decreased by 10 times compared to the average life span in the previous Yuga.

Satya Yuga:- Average human lifespan was 100,000 years

.
Treta Yuga: – Average human lifespan was 10,000 years.

Dwapar Yuga: – Average human lifespan was 1000 years.

Kali Yuga: – Average human lifespan will be 100 years, and will continue to decrease as we run through Kali Yuga.

ABSTRACT

Countless studies showed that [60]fullerene (C₆₀) and derivatives could have many potential biomedical applications. However, while several independent research groups showed that C₆₀ has no acute or sub-acute toxicity in various experimental models, more than 25 years after its discovery the *in vivo* fate and the chronic effects of this fullerene remain unknown. If the potential of C₆₀ and derivatives in the biomedical field have to be fulfilled these issues must be addressed. Here we show that oral administration of C₆₀ dissolved in olive oil (0.8 mg/ml) at reiterated doses (1.7 mg/kg of body weight) to rats not only does not entail chronic toxicity but it almost doubles their lifespan. The effects of C₆₀-olive oil solutions in an experimental model of CCl₄ intoxication in rat strongly suggest that the effect on lifespan is mainly due to the attenuation of age-associated increases in oxidative stress. Pharmacokinetic studies show that dissolved C₆₀ is absorbed by the gastro-intestinal tract and eliminated in a few tens of hours. These results of importance in the fields of medicine and toxicology should open the way for the many possible -and waited for- biomedical applications of C₆₀ including cancer therapy, neurodegenerative disorders, and ageing.

Welcome

to The Alchemy of Prague Event, May 18 to 26

The Alchemy of Prague Event is sponsored and supported by:

We have an incredible line up of workshops, parties and tours all beginning on the evening of May 18th, 2018. This is the 3rd 'Alchemy of Prague' sponsored by Roger Green, and he promises you again there will be days of intrigue, adventure and pure fun! We begin in Prague, then later travel to South Bohemia to the medieval township of Cesky Krumlov, the historical heart and soul of Western Alchemy and the reinstatement of the Hermetic traditions.

Our venue in Prague is the Edward Kelley tower, where John Dee and Edward Kelley would make their alchemical preparations and medicines, among the many rich dramas of that time! It is probably one of the most powerful, historical locations in the world to teach alchemy.

We are delighted to announce the 2018 Smyrna Alchemical Reunion & Sacred Geometry Conference (May 31st – June 4th)

We have an amazing line up of teachers, workshops, parties and tours all beginning on the evening of May 31st, 2018. We are meeting in the ancient Greek city of Smyrna (Currently Izmir, Turkey) which has been an important Aegean port in Asia Minor. The conference is being sponsored by Tufan Guven (as part of the Alchemical Reunion Series) in partnership with Yeni Hayat Gelisim Merkezi.

Join us for an exploration into the philosophy, theory, history, practice and rituals of the alchemical tradition.

Learn the history of Hermetic Mysticism and the techniques used by the forefathers of modern chemistry, herbology and medicine. This five-day conference will provide an in depth look at both inner and outer alchemy utilizing a wide spectrum of alchemical teachings including Vedic, Taoist and the Western Hermetic Traditions.

Throughout the conference we will set up a practical alchemical lab with its array of beakers, vials and fires and take you through the process of making medicines in the traditional way, full of its extracted life forces.

We will also look into the deep connections of sacred geometry and alchemy starting from ancient times

BREAKTHRU TECHNOLOGIES CONFERENCE

3 DAYS OF INNOVATION AND INSPIRATION

South France June 8-11, 2018

Join us this summer in South France for a once-in-a-lifetime opportunity and the power to make a difference. We are living in a phenomenal age where new paradigm thinking is coming of age!

- Theraphi Plasma Device
- Unified Fractal Field applications
- Cold Fusion
- Waste to Energy
- Hyper Sonic Propulsion
- Bio Feedback Technology
- South France Tour

If you're passionate about innovations in alternative energy systems, sustainability, health, longevity and interested in being part of the solutions- not the problems, then the Breakthru-T is the place to be. We are devoted to the development of disruptive technologies that are sustainable, carbon-neutral, economical and community-supportive.

This classic event has attracted a very loyal following, and our inventions continue to gain a worldwide interest. We are delighted to secure a venue in the heart of South France, where you can enjoy the countryside, food and flavors that make this part of the world famous.

Our Conference- as featured in NEXUS Magazine USA Mar/April 2018
