

Announcing TheImploder.com ReLaunch: Mid July 2011 - Sneak Preview PDF- Cover Page
SuperImploder 750 Euro www.fractalfield.com/superimploder
Imploder Shower 129 Euro www.fractalfield.com/implodershower
TriPloder 400 Euro www.fractalfield.com/commercialimploder

THE SUPER IMPLODER

A water re-energizing system for commercial agriculture and domestic home use

The Imploder magnetic water treatment device produces a measurable and validated effect on plant growth, seed germination success, and biomass yields. It is unique technology that combines a magnetic array with a directional nozzle made from the very tough material called Fortron.

The science is based on phase conjugate hydrodynamics, combined with phase conjugate magnetics. The extreme converging magnetic flux lines create the centripetal inertia at the liquid molecular level sorting by mass, resulting in the increase molecular order and spin density.

Standard 3/4 inch also fits metric, suitable for all farming and domestic situations

Cost US \$1,100

>>>>> Optional Electric Blue Cover Cost US \$1135 >> Add to Chart

>>>>> Coming soon 1.5 inch bore for commercial high volume

SUPER IMPLODER MAKES SUPER CHARGED WATER

Benefits

- Revitalized water can be achieved quickly and easily.
- Less amount of water is required for plant growth.
- Cost effective
- Uses established infrastructure
- Measurable and repeatable increase in germination rate
- Increase in nutritional density
- Increase in stem width
- Increase in leaf size
- Increase in plant height
- Sustainable, environmentally friendly
- No moving parts, minimal wear and tear
- No 'parts' to be replaced or dispose of
- Increases bottom line for all users
- Third world communities will have a cost effective means for improving farming methods, increasing food yields and purifying water.
- In the NEAR FUTURE, Every farm, dwelling and community will have THE IMPLODER water treatment device installed.

Seed Germination

To increase seed germination success- farmers can simply spray water with the super imploder attached onto a hose. Running the imploded water thru a sprinkler system is easy

Field crops, Green House, Wineries, Hydroponics, Flower growers etc

The Imploder creates faster growth rate and denser biomass, stronger disease resistant crops, all of which increases the bottom line profits.

Dairy farming, Cattle and Hens

Improves vitality of grass, digestion and assimilation. Increases milk production and quality of meat. Creates healthier eggs and laying performance. Farmers can get significant increases in milk production. Feed The Imploder water directly to milking animals, because the solubility increase makes it easier to suspend the nutrients and butterfat in solution. It makes sense the animal can produce more milk with less biological effort.

Compost

Improves vitality of the compost, helps microbes to be activated. Increases the breakdown of compost /manure and the binding of nitrogen.

Bio Fuel and Ethanol production

Because it creates quicker fermentation rates. It also enables the water to separate faster, which increases fuel production and 'turn around'

Golf courses, public gardens and landscaping

Because it creates healthier and more radiant looking grass, plants and flowers

Industrial and Farm waste management

Because it increases sedimentation rate it will make sewage treatment more effective and quicker. The separation of water from waste material filtration happens faster e.g. waste management from farms e.g. "run-offs".

Food Technology and health products development

Creates more nutritionally rich dense foods. Subtle forces in products such as homeopathic and "Super Foods" will be stronger. Hydrates the body deeply therefore has anti-aging effects.

Aqua Technology -Fish Farms

Makes fish water healthier and resistant to infections. Sludge is quickly broken down

Swimming pools.

We have conducted tests where we ran imploder water for a while every day and noticed the water felt 'silkier' and it was easier to move and swim through it. Also magnetic water treatments commonly see reduction in scale on pipes and certain fungi and algae growth. Since our device is probably the most powerful (in terms of gauss densities alone- not to mention the corrected centripetal spin to absorb that spin densely-from the nozzle) - it is highly likely that we will see even more potent effects on pool and pond waters.

Ice and Snow making Technology

Creates ice and snow quicker, which means you will use less energy, saving much \$\$\$.

Retail

Flower shops

Because wilting flowers can be re-vitalized. Flowers/plants watered with Imploded water will LAST LONGER, saving on wastage.

Health spa's and Natural Healing Clinics

Because imploder water feels silkier, and has more 'life force' and 'healing properties'. Because of water de clustering, it hydrates the body better. It helps to 'alkalize' the body.

Fish/aquarium shops

Makes fish tank water healthier and resistant to infections

Home Use: Drinking and Bathing in Imploded Water

In the kitchen

You can use it for domestic water consumption, as it re-energizes water and increases its ability to hydrate the body. It will reduce the build-up and effects of lime deposits

Note: it does not 'filter the water' of impurities such as chlorine etc. That would need to be done first with a RO filter. However, we are testing to confirm The Imploder increases the rate at which both solids and gaseous pollutants are segregated, sedimented and evaporated.

It tastes and feels like fresh spring water- at a fraction of the cost of bottled water

With The imploded drinking water, people are consistently saying that it tastes 'silkier' and they are able to tell the difference every time. This is probably because of the decreased molecular cluster size and related solubility increase. People have reported various health benefits (one Canadian user swears it helped his back problem).

Obviously we cannot claim health benefits until much more testing is done. It is up to the individual to experiment. Even things like returning hair color from grey, which have been reported with various water treatments, makes sense, because increased solubility means more mineral in hair and bones. There could be also benefits for arthritis sufferers.

In the living room/ office

Makes fish tank water healthier and resistant to infections

Keeps your plants strong and healthy.

Place into a water atomizer spray, to refresh yourself.

Pre energize water before filling a humidifier, makes the effect stronger in the room. Use for intensive cleaning

In the bedroom

Say no more!

However, we will: In Traditional Chinese Medicine, the water element controls the kidneys, reproduction organs, will power and libido. If the quality and hydration of water is stronger, your cells and organs receive more energy

In the shower

Install onto your shower water line to have a re energized shower- the water feels more 'sulkier''

In the garden

Increase production of the family's garden to save money, and grow healthier plants and flowers. Grow the biggest cabbages in the neighborhood

Well water

It will reduce the effects of lime deposits and 'heavy water'

Used for

Successful and increased seed germination

Accelerated plant growth for hydroponics, greenhouse and all crops from agricultural operations

Reducing water consumption

Landscape Gardens

- Water treatment for the food industry (taste/appearance/nutritional density)
- Brewery, distillation, winery, and biomass fuel industries
- Domestic use to purify and re energize town-supplied water.

TAKE A LOOK AT THE SHOWER NOZZLE

READ OUR TEST RESULTS

READ MORE ON THE SCIENCE BEHIND THE IMPLODER

<<<<<<ADD PICTURES HERE>>>>>>

The IMPLODER SHOWER NOZZLE

Applying golden ratio to the physics of water, creating Life Affirming water

No plumber needed to replace your old shower. Simply unscrew your old showerhead, screw wall mount on and connect the hose. Comes in a sleek chrome finish, with a detachable hand shower that makes it easy to direct the flow.

With the Imploder nozzle, you can experience the silkier feeling of vortex-spun water.

The science is that once molecules are spun in water in such a way to flow centripetally, they begin to have a certain memory of connection. This is called spin coherence. The Imploder Shower nozzle does not have the powerful magnetic array of The Imploder water treatment device, but it does have the exquisite spin geometry which installs the hydrodynamic geometry of implosion in the water's molecular memory.

People using the shower nozzle have consistently reported a softer silkier feeling in the water. They talk about a sheeting action- where the water gains "laminar coherence" which is one of the key qualities of 'sensitive chaos' in water. Memory of spin is a good name for the physics of energy, mass and life force.

If your water feels dead, try the Imploder Shower nozzle and see if it doesn't feel a little more like being in a real waterfall in nature. In any case, playing with the Imploder Nozzle's - 'self aware' little 'pony tail' in the water - (see animation below) which responds to touch like a kitten's tail, is alone enough to tickle your watery fantasy. It's very powerful, and gives you a "tingly" massage feel.

Standard 3/4 inch also fits metric

Experience the silkier feeling of votex spun water...

Cost US \$195
